# MEDICAL GRADE DISINFECTION SERVICE

HELPING TO POSSIBLY REDUCE THE SPREAD OF COVID-19, MAINTAINING GOOD HYGIENE, SANITISATION STANDARDS IN THE HOME OR BUSINESS ENVIRONMENT

+  
COVID-19  
RESPONSE

In response to the Corona-virus (COVID-19) outbreak we have launched a new service designed specifically to mitigate the possible contamination of homes, offices and all types of shared spaces.

We use the very latest in medical grade disinfection technology ideally suited to all environments. The treatment is non-toxic and is therefore safe on a majority of surfaces from floors, carpets, kitchen work surfaces, desks, chairs, walls and upholstery.

Using a method known as fogging or misting we can fill a room with small disinfecting particles, creating less disruption to your home or business.

In most cases rooms and surfaces can be used 10 minutes after treatment.

The treatment continues to have an effect 7 days after first applied.

## BENEFITS

- We can work to an appointment suited to you.
- No need to move furniture.
- Ideal for large & small areas.
- No damage to up upholstery.
- Food safe sanitising disinfectant.
- Fast treatment.
- Competitive pricing.
